

Paymentmax Processing to Process Payment Transactions for M3W Group

M3W Group, Inc chooses Paymentmax for legendary service and top security when accepting orders from their global customers

Los Angeles, CA ([PRWeb](#)) April 30, 2008 -- Paymentmax Processing (PMP), a leader in electronic commerce and payment services, has announced a multi-year agreement to provide merchant processing to M3W Group. Paymentmax Processing will be the key payment processing solution for global online consumer and business clients of M3W.

M3W Group, based in Pennsylvania, is the mother corporation for several well-known online retail outlets. Customers come from around the world to purchase M3W's high quality, low-priced products and packages.

"It is vital that M3W Group has a first class processing system that can safely accept payments. After extensive research, we found Paymentmax Processing to be the leader in the electronic payment processing field," said Kurt Mattes, CEO of M3W Group, Inc.

Most notably, Mattes says he appreciates the outstanding customer service his firm gets from Paymentmax. "We can always depend on excellent service from Paymentmax. I can always talk with real people, make direct contact with our account executive. Paymentmax gives you easy access to experts on their staff who can solve any problem," Mattes said.

Paymentmax Processing is now being used at M3W's www.OutletNutrition.com. The site sells a variety of popular nutrition products at deep value prices. OutletNutrition has been awarded the coveted Five-star Top Service rating from Yahoo! Shopping Network. The rating is the highest approval for online retail sites with excellent security and top-notch customer service.

Paymentmax provides online merchants with secure SSL transactions that are PCI compliant, making fraud practically impossible. "In this day when many consumer's are rightly weary their financial information could be compromised, we lead the industry in cutting-edge protection and safety," said Tony Shap, President of Paymentmax Processing.
